

MODERATE INTERNATIONAL PORTFOLIO
Q4 2025 FACT SHEET & PERFORMANCE REVIEW
AS AT DECEMBER 31st, 2025

PORTFOLIO OBJECTIVE

The investment objective for the Colonial Bahamas Fund Class E Units (Moderate International Option) is to achieve moderate growth within a medium to long term time frame with moderate risk. Investors with long-term time horizons (greater than 10 years) and capital growth objectives may consider this portfolio for relatively higher potential long-term investment returns.

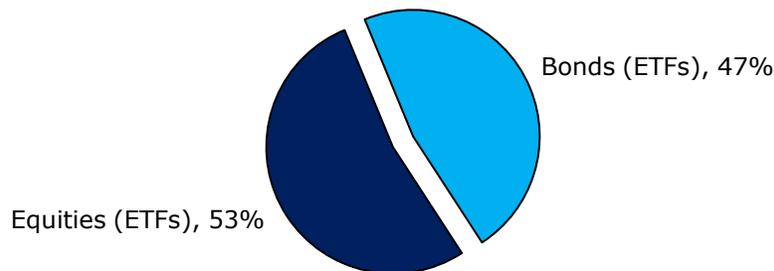

PORTFOLIO RISK and RETURN

This portfolio can be expected to have a moderate degree of volatility and the investor fully understands that he will likely be compensated for this volatility over a long-term holding period. This vehicle is not a suitable short-term investment option nor for investors seeking capital protection or fixed returns. While equities are riskier than cash or bonds, historical evidence from the world's major capital markets shows that equities reward investors with higher rates of return over long periods. Our expected long-term rate of return for this portfolio is 5% to 8% per annum, over rolling five-year periods.

PORTFOLIO ASSET ALLOCATION

Subject as provided below, the portion of the Trust Fund attributable to Class E Units (the "Class E Participating Percentage") will be primarily invested in eligible non-Bahamian dollar denominated: exchange traded funds (ETFs), bonds of investment grade or higher, ordinary or preference shares traded on a recognized stock exchange, private placements and other investment funds approved by the Investment Policy Committee of the investment manager. The long-term asset allocation of this portfolio will be up to 60% in equities or equity-based investment vehicles.

CURRENT ASSET ALLOCATION

TOP HOLDINGS

- iShares Core MSCI World UCITS ETF
- SPDR S&P 400 Mid Cap UCITS ETF

 Volatility (Standard Dev.): 9.8%

The Markets

The fourth quarter of 2025 capped off a robust year for global markets, with global equities rising 3.1% and delivering a strong 21.1% gain for the year amid broad risk-on sentiment and continued tailwinds from fiscal and monetary stimulus. US equities advanced 2.7% in Q4, contributing to an impressive 17.9% year-to-date return as investor confidence remained supported by resilient earnings and easing financial conditions. Bond markets were steady, with global bonds up 0.2% and US bonds gaining 1.1% for the quarter. For the calendar year, global bonds and US bonds returned 8.2% and 7.3%, respectively, reflecting the favorable backdrop of declining Treasury yields and tighter credit spreads. Consistent with trends highlighted throughout the year, a weaker US dollar enhanced non-US asset performance, while strong demand for precious metals—particularly gold and silver—continued to provide diversification benefits amid geopolitical uncertainty.
