

AGGRESSIVE INTERNATIONAL PORTFOLIO
Q1 2026 FACT SHEET & PERFORMANCE REVIEW
AS AT MARCH 31st, 2026

PORTFOLIO OBJECTIVE

The investment objective for the Coralisle Bahamas Fund Class F Units (Aggressive International Option) is to generate long term capital gains by investing in higher risk assets. Investors with long-term time horizons (greater than 10 years) and capital growth objectives should consider this portfolio for relatively higher potential long-term investment returns.

PORTFOLIO RISK and RETURN

This portfolio can be expected to have a high degree of volatility and the investor fully understands that he will likely be compensated for this volatility over a long-term holding period. This vehicle is not a suitable short-term investment option nor for investors seeking capital protection or fixed returns. While equities are riskier than cash or bonds, historical evidence from the world’s major capital markets shows that equities reward investors with higher rates of return over long periods. Our expected long-term rate of return for this portfolio is 7% to 10% per annum, over rolling five-year periods.

PORTFOLIO ASSET ALLOCATION

Subject as provided below, the portion of the Trust Fund attributable to Class F Units (the “Class F Participating Percentage”) will be primarily invested in eligible non-Bahamian dollar denominated: exchange traded funds (ETFs), bonds of investment grade or higher, ordinary or preference shares traded on a recognized stock exchange, private placements and other investment funds approved by the Investment Policy Committee of the investment manager. The long-term asset allocation of this portfolio will be up to 90% in equities or equity-based investment vehicles.

Fund Statistics (5-Year)

Highest 12-month return: 48.7%
 Lowest 12-month return: -18.2%
 Volatility (Standard Dev.): 12.9%

The Markets

The first quarter of 2026 was marked by increased volatility across global markets following a constructive start to the year, as geopolitical tensions and an energy-driven shock shifted investor sentiment. The escalation of conflict in the Middle East disrupted oil supply and drove a sharp rise in energy prices, elevating inflation concerns and tightening financial conditions. Global equities declined 3.6% during the quarter, with U.S. equities falling 4.3%, as risk appetite weakened and valuations adjusted. Bond markets were more resilient but still modestly negative, with global bonds down 0.2% and U.S. bonds declining 0.05%, reflecting rising inflation expectations and reduced expectations for near-term rate cuts.
